MedSoft Version 7.0 Removal Notice

MedSoft Version 7.0 has served as a convenient, optional resource to support MAP Service Providers with medication administration documentation. As MAP documentation practices and technology continue to evolve, MedSoft 7.0 is approaching the end of its availability. **Beginning July 1, 2027**, MedSoft 7.0 will no longer be available for download and will be removed from the MAP Mass website.

To support a smooth transition and continued compliance with MAP Policy 11-5, MAP Service Providers currently using MedSoft are encouraged to begin planning for an alternative, reliable method of medication administration documentation **before July 1, 2027**. Planning ahead will help ensure continuity of required MAP documentation and allow providers adequate time to identify and implement an option that best meets their program needs.

MAP Service Providers are encouraged to transition to the MAP-compliant eMAR provided by DPH. Impruvon Health is the state-sponsored eMAR available to DDS, DMH, DCF, and MassAbility MAP Service Providers and meets all MAP Policy requirements for electronic medication administration documentation. Providers wishing to implement Impruvon, or seeking additional information, should contact their state agency MAP Coordinator or Impruvon Health.
